

# BRETT CULP

## *technical requirements*

- Wireless clip-on **lav microphone**
- Video projector and screen – **16x9 format** (widescreen) suggested to match video clips in presentation
- Connection from Brett's laptop to sound system speakers for **audio playback of video clips**

Brett prefers to run his PowerPoint presentation from **his own PC laptop**.

He prefers the laptop be placed at the table with the AV team, not on-stage.

For playback from Brett's laptop:

- Video playback can be connected to the projector via HDMI.
- Audio playback can be connected through the mini headphone jack.

To test the audio/video playback of his presentation, Brett requests a **30-minute session** with the full A/V team immediately prior to the session, before the audience is admitted into the event space.

Brett prefers to stand center stage with **NO podium** during the keynote.
